

**Summary of Substantive Changes
between the 2009 and the 2013 editions of
ASTM C700, “Vitrified Clay Pipe, Extra Strength, Standard Strength, and
Perforated”**

Presented to the IAPMO Standards Review Committee on June 10, 2013

General: The changes to this standard should not have an impact on currently listed products. The changes are:

- Expanded the scope of the standard to include nominal size 5 in (125 mm) pipe (see Table 1 and Table 2)

Table 1, Minimum Strength (3-Edge Bearing): Expanded the table to include nominal size, 5 in (125 mm) pipe.

Table 2, Available Limits for Dimensional Variation: Expanded the table to include nominal size 5 in (125 mm) pipe.
