Summary of Substantive Changes between the 2013 and the 2013a editions of ASTM D2467, “Poly(Vinyl Chloride) (PVC) Plastic Pipe Fittings, Schedule 80”

Presented to the IAPMO Standards Review Committee on December 9, 2013

General: The change to this standard is editorial and will not have an impact on currently listed products. The editorial change is:

• Clarified the minimum outside diameter of reducer bushings (see Section 6.1.2).

Section 6, Requirements: Clarified the minimum outside diameter of reducer bushings:

6.1 Dimensions and Tolerances:
6.1.2 When multistep reducer bushings are cored out, the inner socket shall be reinforced from the outer wall by a minimum of three ribs extending from the top of the inner socket to the deepest extremity of the coring. The transition from D to DJ (Table 4) shall be straight, tapered as shown, or radiused. A positive taper in the same direction of the taper in the socket on the outside diameter of the bushing is optional (see XA/XB in Table 3). Any point measured along the outside diameter of the bushing (between points XA and XB) shall not fall below minimum pipe OD.
