Summary of Substantive Changes
between the 2008 and the 2013 editions of
ASTM F679 “Poly(Vinyl Chloride) (PVC) Large-Diameter Plastic Gravity
Sewer Pipe and Fittings”

Presented to the IAPMO Standards Review Committee on November 4, 2013

General: The changes to this standard should not have an impact on currently listed products.
The major change is:
• Expanded the scope to include 54 in and 60 in pipe and fittings (see Section 1.1)

Section 1, Scope: Expanded the scope to include 54 in and 60 in pipe and fittings as follows;
1.1 This specification covers requirements and test methods for materials, dimensions, workmanship,
flattening resistance, impact resistance, pipe stiffness, extrusion quality, joining system, and a form of
marking for large diameters, 18 to 48 in, poly(vinyl chloride) (PVC) sewer pipe and fittings with
integral bell elastomeric seal joints and smooth inner walls.

Table 1, Pipe Dimensions and Minimum Pipe Stiffness: Added requirements for 54 in and 60 in pipe.
