Summary of Substantive Changes
between the August 2010 and July 2012 editions of
SRCC Standard 100, “Test Methods and Minimum Standards for Certifying
Solar Collectors”

Presented to the IAPMO Standards Review Committee on August 13, 2012

**General:** There are no significant changes to this standard and there should not be an impact on currently listed products. There are only formatting changes as follows:

- Increased the font size and changed the formatting.
- The underline was removed from the different types of collectors in Section 5.3.1
