

**Summary of Substantive Changes  
between the component standards  
ANSI A118.10 “American National Standard Specifications for Load Bearing, Bonded,  
Waterproof Membranes for Thin-set Ceramic Tile and Dimension Stone Installation –  
2014 (R2019)”  
And  
ANSI A118.12 “Specifications for Crack Isolation Membranes for Thin-Set Ceramic Tile and  
Dimension Stone Installation -  
2014 (R2019)”  
of the  
2017 and the 2020 editions of  
ANSI A108, A118, and A136 “Specifications for the Installation of Ceramic Tile”**

**Presented to the IAPMO Standards Review Committee on August 10, 2020**

**General:** There were no changes to either ANSI A118.10 or ANSI A118.12. These standards were reaffirmed in 2019. The standards are however published as part of the 2020 version of ANSI A108, A118, & A136 “Specifications for the Installation of Ceramic Tile (Material & Installation Standards)”

**Note:** *The current editions of ANSI A118.10 and ANSI A118.12 are adopted from this compendium. The remaining standards in this compendium are not used for product listing at this time and have not been reviewed as part of this summary of changes.*
