Summary of Substantive Changes
between the 2014 and the 2014a editions of
ASTM D3034 “Type PSM Poly(Vinyl Chloride) (PVC)
Sewer Pipe and Fittings”

Presented to the IAPMO Standards Review Committee on December 8, 2014

**General:** The changes to this standard should not have an impact on currently listed products. The substantive change is:

- Added the option of using a 30-lb weight for the impact resistance test (see Section 8.7).

Section 8.7, Impact Resistance

*Determine the impact resistance of the pipe in accordance with the applicable section of Test Method D2444, using a 20-lb or 30-lb Tup A and the flat plate Holder B. Test six specimens each 150 mm (6 in.) long at the impact levels given in Table 2. All shall pass. If one fails, test another six specimens; 11 passes out of 12 tested shall be acceptable.*
