

**Summary of Substantive Changes
between the 2013 and the 2013a editions of
ASTM F679 “Poly(Vinyl Chloride) (PVC) Large-Diameter
Plastic Gravity Sewer Pipe and Fittings”**

Presented to the IAPMO Standards Review Committee on February 10, 2014

General: General: The changes to this standard might have an impact on currently listed products. The substantive change is:

- Added a marking requirement for gasketed pipe (see Section 11.1.6)

Section 6.2.2, Wall Thickness: Clarified the wall thickness variability as follows:

NOTE 2—The wall thickness variability in any cross section of the pipe is normally 12% or less.

Section 11.1, Pipe Marking: Added a requirement to include insertion depth marking on gasketed pipe as follows:

11.1.6 Gasketed pipe shall have an insertion depth mark on the spigot end.
