

**Summary of Substantive Changes
between the 2011 and 2016 editions of
NSF/ANSI 372 “Drinking Water System Components - Lead Content”**

Presented to the IAPMO Standards Review Committee on July 11, 2016

General: The changes to this standard should not have an impact on currently listed products. The substantive changes are:

- Updated referenced standards to current published editions (see Sections 1.3).

Section 1.3, Normative references: Updated the dated referenced standards to the current published editions and included text to clarify the edition of undated referenced standards to use as follows: *The following documents contain procedures referenced in this document. The following documents contain requirements that, by reference in this text, constitute requirements of this Standard. At the time this Standard was balloted, the editions listed below were valid. All documents are subject to revision, and parties are encouraged to investigate the possibility of applying the recent editions of the documents indicated below. The most recent published edition of the document shall be used for undated references.*

ASTM E29-~~08~~13. Standard Practice for Using Significant Digits in Test Data to Determine Conformance with Specifications¹

ASTM E255-07 (2014). Standard Practice for Sampling Copper and Copper Alloys for the Determination of Chemical Composition¹

EPA SW 846 Test Methods for Evaluating Solid Waste, Physical Chemical Methods, Method 3050 B – Acid Digestion of Sediments, Sludges, and Soils ²

EPA SW846, Method 3052 - Microwave Assisted Acid Digestion of Siliceous and Organically Based Matrices²

EPA SW 846, Method 6010C – Inductively Coupled Plasma-Atomic Emission Spectrometry²
